PROFILE

MBA in Finance & Business Analytics with experience in banking operations, SLA-bound reconciliation, compliance controls, and MI reporting. Completed 10+ monthly reconciliations at 100% accuracy with zero compliance breaches under RBI guidelines, recovered INR 50L from 3 high-risk NPA accounts, and cut report time by 75% with Excel VBA automation. Works in Excel, SQL, Python, Power BI, Tableau, and Claude.

PROFESSIONAL EXPERIENCE

Data Analyst Intern - WeIntern Pvt. Ltd.

Feb 2026 – Present | Online

- Audited client datasets for missing values, duplicates, and outliers, and ran consistency checks within each customer cohort to confirm the data could be trusted.
- Cleaned and standardized segmented client data by handling nulls, removing duplicates, and treating outliers, so downstream teams could use it directly for analysis.
- Wrote reports that turned raw data patterns into findings for management and flagged data issues, which shortened the time it took to fix them.

Management Trainee - Home First Finance Company

May 2025 – Dec 2025 | Mumbai

- Recovered INR 50L from 3 high-risk NPA accounts, all repaid in full, by grouping delinquent accounts into cohorts and applying recovery steps under RBI compliance rules.
- Completed 10+ monthly financial reconciliations and documentation packages with 100% accuracy and no compliance breaches, checking records against business rules and processing guidelines within an 8-hour SLA.
- Cut documentation rework by 25% in one month by studying complaint patterns and agreeing fixes with a 7-person credit and operations team.

Financial Analyst Intern - Airway Media

Jan 2024 – Apr 2024 | India

- Built financial models by business unit and turned raw financial data into outputs that management used in performance reviews, using financial modelling and pattern analysis.

Data Analyst Intern - Infosys

Mar 2023 – May 2023 | Remote

- Cut financial report generation time by 75% for 2 business units by automating MI reporting with Excel VBA and macros.
- Reduced manual reconciliation effort by 30% (hours saved per cycle) by replacing manual tracking with Excel tools for issue resolution and escalation.
- Submitted formal financial reports for management review with no errors.

PROJECTS

Banking Analytics - Risk Profiling & Portfolio Analytics Dashboard

Feb 2025 | [View on GitHub](#)

- Identified transaction anomalies and risk flags across 3,000+ banking transactions by grouping clients by income tier, loyalty, and credit risk, using SQL and Python.
- Cut manual analysis effort by 40% per review cycle with a Power BI dashboard of 4 operational KPIs for portfolio reviews.

KSB Limited - Corporate Financial Analysis & Formal Reporting

Jul 2026 | [View on GitHub](#)

- Built a 6-sheet, 1,446-formula FY26–30 forecasting and budgeting model with 3-statement analysis, cash flow projections, DCF (FCFF), and margin analysis across business segments, with all automated validation checks passing.
- Added Base/Bull/Bear scenarios and variance analysis using CHOOSE/INDEX logic, so assumptions flow through the P&L, FCFF, and DCF as revenue and cost inputs change.

Churn-AI - Customer Churn Analytics Platform

Jun 2026 | [View on GitHub](#)

- Analyzed 6,418 customer records across 32 attributes in Python (Pandas, Matplotlib, Seaborn) and found 27% churn (1,732 customers), with competitors the largest single cause (761, or 44%) and month-to-month contracts churning at 46.5% vs. 2.7% on two-year contracts (17x higher).
- Built a React and Python reporting layer with Claude's help to present the findings.

Superstore Management System - EDA

Apr 2026 | [View on GitHub](#)

- Analyzed \$12.74M of simulated sales across 1,000+ orders (data generated with Python Faker, NumPy, Pandas) and built 3 Power BI dashboards tracking 194 low-stock items and 989 customers across 4 regions.

SKILLS

Analytics: Excel (VBA, Macros, Advanced Formulas, Dashboards), Power BI, SQL (Joins, Window Functions, CTEs), Python (Pandas, NumPy, Matplotlib, Seaborn), Tableau

Finance & BFSI: Financial Modelling, DCF, WACC, Trading Comps, Credit Risk, NPA Recovery, Loan Portfolio Monitoring, Transaction Profiling

Operations: SLA/KRA Tracking, Reconciliation, Data Quality, Regulatory Compliance Reporting, Issue Resolution, Escalation Management, MI Reporting, Process Automation

Tools: Jupyter Notebook, VS Code, Git/GitHub, Google Sheets, MS Office Suite (Word, Excel, PowerPoint), Claude

EDUCATION & CERTIFICATIONS

Jagdish Sheth School of Management, Bangalore — MBA in Finance & Business Analytics | 2023 – 2025

Certifications: Coding Ninjas – [Data Analysis with Generative AI](#) | Jobaaj – [Financial Modelling & Valuations](#) | Infosys – [Agile Scrum](#)
